SUBJECT INDEX

abscisic acid
Relationship of ; to somatic embryogenesis in *Dactylis glomerata* 495
accumulation, starch
during hydroponic growth of spinach and basil plants under carbon dioxide enrichment 313
acid immersion
Actions of ; red light and gibberellin A_3 treatments on germination of thermodormant lettuce seeds 397
acidic precipitation, simulated
Effects of ozone and ; on ectomycorrhizal formation on loblolly pine seedlings 423
Acidification
, growth promoter and red light effects on germination of skotodormant seeds of *Hygrophila auriculata* 471
Actinidia deliciosa cv. Tomuri
Photosynthetic carbon dioxide uptake and oxygen accumulation during *in vitro* culture of 523
adaptation
of Synechococcus sp. to 0.4 M NaCl; Changes in RNA and protein synthesis with the 539
Adaptive responses
of roots and root systems to seasonal changes 175
Air temperature
modifies the size-enhancing effects of atmospheric CO_2 enrichment on sour orange tree leaves 293
alcohol dehydrogenase activity
, root porosity, ethylene production and photosynthesis in *Spartina patens*; The influence of soil oxygen deficiency on 565
aluminum avoidance
of *Mucuna pruriens* var. *utilis*; Phosphate nutrition effects on 75
"Ambersweet"
hybrid with "Valencia" orange; Photosynthesis and freeze tolerance comparisons of the newly released 391
ammonium, short-term effect of
on nitrogenase activity of cyanobacteria from rice fields; Influence of pH, light intensity and oxygen on the 545
assay, viability, triphenyl tetrazolium chloride reduction
Applicability of the ; to the measurement of oxidative damage to cucumber cotyledons by bisulfite 357
atmospheric CO_2 enrichment
Air temperature modifies the size-enhancing effects of ; on sour orange tree leaves 293
Interactive effects of , and light intensity reductions on net photosynthesis of sour orange tree leaves 367
basil plants
under carbon dioxide enrichment; Starch accumulation during hydroponic growth of spinach and ; 313
Below ground responses
as indicators of environmental change 190
bisulfite
Applicability of the triphenyl tetrazolium chloride reduction viability assay to the measurement of oxidative damage to cucumber cotyledons by 357
broom snakeweed (*Gutierrezia sarothrae*)
Drought-induced changes in water relations in ; under greenhouse- and field-grown conditions 323
cadmium transport, pH-Dependent
inhibits photosynthesis in the cyanobacterium *Synechocystis aquatilis* 331
carbohydrate content
and cold tolerance of red spruce foliage; Moderate water stress alters 383
carbon costs
The ; of root systems of perennial fruit crops 131
carbon dioxide enrichment
Starch accumulation during hydroponic growth of spinach and basil plants under 313
carbon dioxide uptake, Photosynthetic
and oxygen accumulation during *in vitro* culture of *Actinidia deliciosa* cv. Tomuri 523
Carbon nutrition
, root branching and elongation: can the present state of knowledge allow a predictive approach at a whole-plant level? 121
cell division
in root meristems of natural populations of *Dactylis glomerata* of contrasting latitudinal origins; Effects of temperature on 433
cells, root
The ultrastructural response of ; to stressful conditions 11

cells, rose, cultured
Plasma membrane effects of salicylic acid treatment on 267
cereal plants
The gravitropic response of roots and the shaping of the root system 141
chlorine, concentrations of
sulfur, sodium and iron on/in the thallus cortex in the lichen *Ramalina duriaei* (DeNot) Bagl.; Temporal and spatial fluctuations of ethylene production and 553
chlorophyll fluorescence
Assessing cold tolerance in *Picea* using 377
Chromium toxicity
in *Salvia sclarea*—I. Effects of hexavalent chromium on seed germination and seedling development 405
CO_2 enrichment, atmospheric
Air temperature modifies the size-enhancing effects of ; on sour orange tree leaves 293
Interactive effects of : and light intensity reductions on net photosynthesis of sour orange tree leaves 367
CO_2-induced reductions
in stomatal conductance and concomitant increases in foliage temperature; A general relationship between 443
cold tolerance, Assessing
in *Picea* using chlorophyll fluorescence 377
cold tolerance
of red spruce foliage; Moderate water stress alters carbohydrate content and 383
conductance, stomatal
A general relationship between CO_2-induced reductions in ; and concomitant increases in foliage temperature 443
controlled freezing
of attached red spruce branches; Physiological response to 591
cotyledons, cucumber
Applicability of the triphenyl tetrazolium chloride reduction viability assay to the measurement of oxidative damage to : by bisulfite 357
crop plants, dicotyledonous
Mineral status of, in relation to their constitutional tolerance to lead 575
crops, fruit, perennial
The carbon costs of root systems of 13
cyanobacteria
from rice fields; Influence of pH, light intensity and oxygen on the short-term effects of ammonium on nitrogenase activity of 545
cyanobacterium *Synechocystis aquatilis*,
pH-Dependent cadmium transport inhibits photosynthesis in the 331
cytokinins
Shoot–root interactions during floral transition: a possible role for 459
cucumber cotyledons
Applicability of the triphenyl tetrazolium chloride reduction viability assay to the measurement of oxidative damage to ; by bisulfite 357
Cucumis melo L.
Effects of gamma irradiation of pollen on parthenogenetic haploid production in muskmellon ( ) 301
Dactylis glomerata
Effects of temperature on cell division in root meristems of natural populations of ; of contrasting latitudinal origins 433
Relationship of abscisic acid to somatic embryogenesis in 495
Dactylis glomerata leaf segments
In vitro response of , as affected by growing donor plants in radioactive soil 501
damage, oxidative
to cucumber cotyledons by bisulfite; Applicability of the triphenyl tetrazolium chloride reduction viability assay to the measurement of 357
deficit, water
Influence of, on the phytotoxicity of imazamethabenz and fenoxaprop among five wild oat populations 283
development, seedling
Chromium toxicity in *Salvia sclarea*—I. Effects of hexavalent chromium on seed germination and 405
dicotyledonous crop plants
Mineral status of, in relation to their constitutional tolerance to lead 575
donor plants, growing
in radioactive soil; *In vitro* response of *Dactylis glomerata* leaf segments as affected by 501

Drought-induced changes
in water relations in broom snakeweed (*Gutierrezia sarothrae*) under greenhouse- and field-grown conditions..... 323
dry matter deposition rates
Osmoticum, water, and ; in the growth zone of sorghum leaves under water deficit conditions..... 447
ectomycorrhizal formation
on loblolly pine seedlings; Effects of ozone and simulated acidic precipitation on 423
Editorial
An analysis of the accuracy of journal references in papers accepted for publication in EEB 457
Electric field
-induced inhibition of electrogenic pumping in *Nitella*: analysis for transmembrane potential hypo- and hyper-polarization effects..... 209
electrogenic pumping
Electric field-induced inhibition of ; in *Nitella*: analysis for transmembrane potential hypo- and hyper-polarization effects..... 209
embryogenesis, somatic
in *Dactylis glomerata*; Relationship of abscisic acid to..... 495
energy and structural relations
with the whole plant; Responses of roots to hypoxia: their..... 41
enrichment, carbon dioxide
Starch accumulation during hydroponic growth of spinach and basil plants under, ... 313
enrichment, soil
The impact of the ; on the growth of root systems 53
environmental change
Below ground responses as indicators of..... 189
Ericaceae, sclerophyllous
Responses of ; to enhanced levels of ultraviolet-B radiation..... 233
ethylene production
and photosynthesis in *Spartina patens*: the influence of soil oxygen deficiency on alcohol dehydrogenase activity, root porosity 565
Temporal and spatial fluctuations of , and concentrations of sulfur, sodium, chlorine and iron on/in the thallus cortex in the lichen *Ramalina duriaei* (DeNot) Bagl. 553
fenoxaprop
Influence of water deficit on the phytotoxicity of imazamethabenz and ; among five wild oat populations 283
floral transition
Shoot–root interactions during, : a possible role for cytokinins..... 459
fluctuations, spatial and temporal
of ethylene production and concentrations of sulfur, sodium, chlorine and iron on/in the thallus cortex in the lichen *Ramalina duriaei* (DeNot) Bagl. 553
fluorescence, chlorophyll
Assessing cold tolerance in *Picea* using..... 377
foliage temperature
A general relationship between CO_2 induced reductions in stomatal conductance and concomitant increases in.... 443
foliose lichens
Seasonal growth of ; in successive years in South Gwynedd, Wales 225
freeze tolerance
comparisons of the newly released "Ambersweet" hybrid with "Valencia" orange; Photosynthesis and 391
freezing, controlled
of attached red spruce branches; Physiological response to 591
fruit crops, perennial
The carbon costs of root systems of..... 131
function
of root systems; VA mycorrhizal inflection and the morphology and 159
gamma irradiation of pollen
Effects of ; on parthenogenetic haploid production in muskmellon (*Cucumis melo* L.) 301
germinated pollen grains
A method to separate ungerminated from 415
germination
of skotodormant seeds of *Hygrophila auriculata*; Acidification, growth promoter and red light effects on 471
germination
of thermodormant lettuce seeds; Actions of acid immersion, red light and gibberellin A_3 treatments on 377

germination, seed
and seedling development. Chromium toxicity in *Salvia sclarea*—I. Effects of hexavalent chromium on 405
gibberellin A_3
Actions of acid immersion, red light and ; treatments on germination of thermodormant lettuce seeds 397
gravitropic respnse
of roots and the shaping of the root system in cereal plants; The 141
greenhouse- and field-grown conditions
Drought-induced changes in water relations in broom snakeweed (*Gutierrezia sarothrae*) under 323
growing donor plants in radioactive soil
In vitro response of *Dactylis glomerata* leaf segments as affected by 501
growth
of root systems; The impact of the soil environment on the 53
of young soybean plants; Effects of SO_2 and salinity on nitrogenase activity, nitrogen concentration and 529
growth dynamics, primary root
The effects of temperature on ; and lateral root distribution in garden pea (*Pisum sativum* L., cv. "Alaska") 243
growth, hydroponic
of spinach and basil plants under carbon dioxide enrichment; Starch accumulation during 313
growth promoter
Acidification ; and red light effects on germination of skotodormant seeds of *Hygrophila auriculata* 471
growth, Seasonal
of foliose lichens in successive years in South Gwynedd 225
growth, root
and mineral nutrition; Interaction between 63
growth zone
of sorghum leaves under water deficit conditions; Osmoticum, water and dry matter deposition rates in the 447
Gutierrezia sarothrae
Drought-induced changes in water relations in broom snakeweed ( ) under greenhouse- and field-grown conditions 323
hairs, Leaf
of *Olea europaea* protect underlying tissues against ultraviolet-B radiation damage 341
heavy metals
Response of roots of trees to 99
The response of roots of herbaceous plants species to 85
hierarchical organization
of plant life; The response of roots and root systems to their environment—an interpretation derived from an analysis of 1
herbaceous plant species, roots of
Response of , to heavy metals 85
Histological effects
of ozone on slash pine (*Pinus elliotti* var. *densa*) 505
hydroponic growth
of spinach and basil plants under carbon dioxide enrichment; Starch accumulation during 313
Hygrophila
Acidification, growth promoter and red light effects on germination of skotodormant seeds of 471
hypoxia
Responses of roots to ; : their structural and energy relations with the whole plant 41
imazamethabenz
Influence of water deficit on the phytotoxicity of fenoxaprop and ; among five wild oat populations 283
impedance, mechanical
Responses of roots to 27
indicators
of environmental change; Below ground responses as 189
infection, VA mycorrhizal
and the morphology and function of root systems 159
Interaction
between root growth and mineral nutrition 63
interactions, Shoot–root
during floral transition: a possible role for cytokinins 459
in vitro culture
of *Actinidia deliciosa* cv. Tomuri; Photosynthetic carbon dioxide uptake and oxygen accumulation during 523

In vitro response
of *Dactylis glomerata* leaf segments as affected by growing donor plants in radioactive soil 501
ions, salt
Secretion and uptake of ; by detached *Leptochloa fusca* L. Kunth (Kallar grass) leaves 259
irradiation, gamma, of pollen
Effects of , on parthenogenetic haploid production in muskmellon (*Cucumis melo* L.) 301
irradiation, solar
Effects of , on motility and pigmentation of three species of phytoplankton 515
iron, concentrations of
sulfur, sodium and chlorine on/in the thallus cortex in the lichen *Ramalina duriaei* (DeNot) Bagl.; Temporal and spatial fluctuations of ethylene production and 553
Kallar grass
Secretion and uptake of salt ions by detached *Leptochloa fusca* L. Kunth ( ) leaves 259
lead, tolerance to
Mineral status of dicotyledonous crop plants in relation to their constitutional 575
Leaf hairs
of *Olea europaea* protect underlying tissues against ultraviolet-B radiation damage 341
leaf segments, *Dactylis glomerata*
In vitro response of ; as affected by growing donor plants in radioactive soil 501
leaves, *Leptochlora fusca* L. Kunth (Kallar grass)
Secretion and uptake of salt ions by detached 259
leaves, sorghum
Osmoticum, water, and dry matter deposition rates in the growth zone of ; under water deficit conditions 447
leaves, sour orange tree
Air temperature modifies the size-enhancing effects of atmospheric CO_2 enrichment on 293
Interactive effects of atmospheric CO_2 enrichment and light intensity reductions on net photosynthesis of 367
Leptochloa fusca L. Kunth leaves, detached
Secretion and uptake of salt ions by 259
lettuce seeds, thermodormant
Actions of acid immersion, red light and gibberellin A_3 treatments on germination of 397
lichen *Ramalina duriaei* (DeNot) Bagl., the
Temporal and spatial fluctuations of ethylene production and concentrations of sulfur, sodium chlorine and iron on/in the thallus cortex in 553
lichens, foliose
Seasonal growth of ; in successive years in South Gwynedd, Wales 225
light intensity; pH, oxygen and
Influence of , on the short-term effect of ammonium on nitrogenase activity of cyanobacteria from rice fields .. 545
light intensity reductions
Interactive effects of atmospheric CO_2 enrichment and ; on net photosynthesis of sour orange tree leaves 367
light, red
and gibberellin A_3 treatments on germination of thermodormant lettuce seeds; Actions of acid immersion 397
loblolly pine seedlings
Effects of ozone and simulated acidic precipitation on ectomycorrhizal formation on 423
mechanical impedance
Response of roots to 27
membrane, Plasma
effects of salicylic acid treatment on cultured rose cells 267
meristems, root, cell division in
Effects of temperature on ; of natural populations of *Dactylis glomerata* of contrasting latitudinal origins 433
metabolism parameters, nitrogen
Responses of , to sublethal SO_2 pollution in wheat [*Triticum aestivum* cv. Wilgoyne (Ciano/Gallo)] under mild NaCl stress 479
metals, heavy
Response of root of trees to 99
The response of roots of herbaceous plant species to 85
mineral nutrition
Interaction between root growth and 63
Mineral status
of dicotyledonous crop plants in relation to their constitutional tolerance to lead 575

morphology
and function of root systems; VA mycorrhizal infection and the 159
motility
and pigmentation of three species of phytoplankton; Effects of solar irradiation on 515
Mucuna pruriens var. *utilis*
Phosphate nutrition effects on aluminium avoidance of 75
muskmellon (*Cucumis melo* L.)
Effects of gamma irradiation of pollen on parthenogenetic haploid production in 301
mycorrhizal infection, VA
and the root morphology and function of root systems 159
NaCl
Changes in RNA and protein synthesis associated with the adaptation of *Synechococcus* sp. to 0.4 M ; 539
NaCl stress, mild
Responses of nitrogen metabolism parameters to sublethal SO_2 pollution in wheat [*Triticum aestivum* cv. Wilgoyne (Ciano/Gallo)] under 479
Nitella
Electric field-induced inhibition of electrogenic pumping in ; : analysis for transmembrane potential hypo- and hyperpolarization effects 209
nitrogen concentration
, nitrogenase activity and growth of young soybean plants; Effects of SO_2 and salinity 529
Responses of , to sublethal SO_2 pollution in 479
wheat [*Triticum aestivum* cv. Wilgoyne (Ciano/Gallo)] under mild NaCl stress
Nitrogen uptake
by tropical orchids 273
nitrogenase activity
of cyanobacteria from rice fields; Influence of pH, light intensity and oxygen on the short-term effect of ammonium on 545
, nitrogen concentration and growth of young soybean plants; Effects of SO_2 and salinity on 529
nutrition, Carbon
, root branching and elongation : can the present state of knowledge allow a predictive approach at a whole-plant level? 121
nutrition, mineral
Interaction between root growth and ; 63
nutrition, Phosphate
effects of aluminum avoidance of *Mucuna pruriens* var. *utilis*. 75
oat populations, wild
Influence of water deficit on the phytotoxicity of imazamethabenz and fenoxaprop among five ; 283
Olea europaea, Leaf hairs of
protect underlying tissues against ultraviolet-B radiation damage 341
orange
Photosynthesis and freeze tolerance comparisons of the newly released "Ambersweet" hybrid with "Valencia" 391
orange tree leaves, sour
Interactive effects of atmospheric CO_2 enrichment and light intensity reductions on net photosynthesis of 367
orange tree, sour, leaves
Air temperature modifies the size-enhancing effects of atmospheric CO_2 enrichment on 293
organization, hierarchical
of plant life; The responses of roots and root systems to their environment—an interpretation derived from an analysis of the 1
orchids, tropical
Nitrogen uptake by 273
Osmoticum
, water and dry deposition rates in the growth zone of sorghum leaves under water deficit conditions 447
oxidative damage
to cucumber cotyledons by bisulfite; Applicability of the triphenyl tetrazolium chloride reduction viability assay to measurement of 357
oxygen accumulation
during *in vitro* culture of *Actinidia deliciosa* cv. Tomuri; Photosynthetic carbon dioxide uptake and 523
oxygen deficiency, soil
The influence of , on alcohol dehydrogenase activity, root porosity, ethylene production and photosynthesis in *Spartina patens* 565

oxygen; pH, light intensity and
Influence of ; on the short-term effect of ammonium on nitrogenase activity of cyanobacteria from rice fields.. 545
ozone
Histological effects of , on slash pine (*Pinus elliotti* var. *densa*) 505
ozone, Effects of
and simulated acid precipitation on ectomycorrhizal formation on loblolly pine seedlings 423
parthenogenetic haploid production
in muskmellon (*Cucumis melo* L.); Effects of gamma irradiation of pollen on..... 301
pea, garden
The effects of temperature on primary root growth dynamics and lateral root distribution in ; (*Pisum sativum* L., cv. "Alaska") 243
pH, light intensity and oxygen
Influence of , on the short-term effect of ammonium on nitrogenase activity of cyanobacteria from rice fields.. 545
pH-Dependent cadmium transport
inhibits photosynthesis in the cyanobacterium *Synechocystis aqualitis*..... 331
Phosphate nurition
effects of aluminum avoidance of *Mucuna pruriens* var. *utilis*..... 75
Photosynthesis
and freeze tolerance comparisons of the newly released "Ambersweet" hybrid with "Valencia" orange 391
photosynthesis
in *Spartina patens*; The influence of soil oxygen deficiency on alcohol dehydrogenase activity, root porosity, ethylene production and..... 565
in the cyanobacterium *Synechocystis aquatilis*; pH-Dependent cadmium transport inhibits..... 331
photosynthesis, net
of sour orange tree leaves; Interactive effects of atmospheric CO_2 enrichment and light intensity reductions on..... 367
Photosynthetic carbon dioxide uptake
and oxygen accumulation during *in vitro* culture of *Actinidia deliciosa* cv. Tomuri 253
phytoplankton
Effects of solar irradiation on motility and pigmentation of three species of..... 515
phytotoxicity
of imazmethabenz and fenoxaprop among five wild oat populations; Influence of water deficit on the 283
Picea
Assessing cold tolerance in ; using chlorophyll fluorescence..... 377
pine seedlings, loblolly
Effects of ozone and simulated acidic precipitation on ectomycorrhizal formation on..... 423
pine, slash
(*Pinus elliotti* var. *densa*); Histological effects of ozone on 505
Pinus elliotti var. *densa*
Histological effects of ozone on slash pine ( ) 505
Pisum sativum L., cv. "Alaska"
The effects of temperature on primary root growth dynamics and lateral root distribution in garden pea..... 243
Plasma membrane
effects of salicylic acid treatment on cultured rose cells..... 267
pollen, gamma irradiation of
Effect of , on parthenogenetic haploid production in muskmellon (*Cucumis melo* L.) 301
pollen grains
A method to separate germinated from ungerminated..... 415
porosity, root
in *Spartina patens*; The influence of soil oxygen deficiency on alcohol dehydrogenase activity, ethylene production, photosynthesis and 565
potential, transmembrane
hypo- and hyperpolarization effects; Electric field-induced inhibition of electrogenic pumping in *Nitella*: analysis for..... 209
primary root growth dynamics
The effects of temperature on ; and lateral root distribution in garden pea (*Pisum sativum* L., cv. "Alaska") 243
protein synthesis, RNA and
Changes in , associated with the adaptation of *Synechococcus* sp. to 0.4 M NaCl 539
radiation damage, ultraviolet-B
Leaf hairs of *Olea europaea* protect underlying tissues against..... 341

radiation, ultraviolet-B
Responses of sclerophyllous Ericaceae to enhanced levels of 233
radiation, UVB, enhanced
Biological responses of two soybean cultivars exposed to 347
radioactive soil
In vitro response of *Dactylis glomerata* leaf segments as affected by giving donor plants in 501
Ramalina duriaei (DeNot) Bagl.
Temporal and spatial fluctuations of ethylene production and concentrations of sulfur, sodium chlorine and iron on/in the thallus cortex in the lichen 553
rates, dry matter deposition
Osmoticum, water and ; in the growth zone of sorghum leaves under water deficit conditions 447
red light
and gibberellin A_3 treatments on germination of thermodormant lettuce seeds; Actions of acid immersion 397
red light effects
Acidification, growth promoter and ; on germination of skotodormant seeds of *Hygrophila auriculata* 471
red spruce branches, attached
Physiological response to controlled freezing of 591
red spruce foliage
Moderate water stress alters carbohydrate content and cold tolerance of 383
response, gravitropic
of roots and the shaping of the root system in cereal plants; The 141
Response of roots
of herbaceous plant species to heavy metals; The 85
of trees to heavy metals 99
to mechanical impedance 27
response, Physiological
to controlled freezing of attached red spruce branches 591
response, ultrastructural
The ; of root cells to stressful conditions 11
Responses
of sclerophyllous Ericaceae to enhanced levels of ultraviolet-B radiation 233
responses, Adaptive
of roots and root systems to seasonal changes 175
responses, Below ground
as indicators of environmental change 189
Responses of nitrogen metabolism
parameters of sublethal SO_2 pollution in wheat [*Triticum aestivum* cv. Wilgoyne (Ciano/Gallo)] under mild NaCl stress 479
Responses of roots
to hypoxia: their structural and energy relations with the whole plant 41
responses of roots and root systems
to their environment; The , —an interpretation derived from an analysis of the hierarchical organization of plant life 1
rice fields, cyanobacteria from
Influence of pH, light intensity and oxygen on the short-term effect of ammonium on nitrogenase activity 545
RNA and protein synthesis
Changes in , associated with the adaptation of *Synechococcus* sp. to 0.4 M NaCl 539
root branching and elongation
Carbon nutrition ; : can the present state of knowledge allow a predictive approach at a whole plant level? 121
root cells
The ultrastructural response of ; to stressful conditions 11
root distribution, lateral
The effects of temperature on primary root growth dynamics and ; in garden pea (*Pisum sativum* L., cv. "Alaska") 243
Root growth
and mineral nutrition; Interaction between 63
root growth dynamics, primary
The effects of temperature on ; and lateral root distribution in garden pea (*Pisum sativum* L., cv. "Alaska") 243
root meristems, cell division in
Effect of temperature on ; of natural populations of *Dactylis glomerata* of contrasting latitudinal origins 433

root porosity
in *Spartina patens*; The influence of soil oxygen deficiency on alcohol dehydrogenase activity, ethylene production, photosynthesis and 565
root system
in cereal plants; The gravitropic response of roots and the shaping of the 141
root systems, growth of
The impact of the soil environment on the 53
of perennial fruit crops; The carbon costs of 131
VA mycorrhizal infection and the morphology and function of 159
roots and root systems
Adaptive responses of ; to seasonal changes 175
The response of , to their environment—an interpretation derived from the hierarchical organization of plant life 1
roots, gravitropic response of
and the shaping of the root system in cereal plants; The 141
roots
of herbaceous plant species; Response of , to heavy metals 85
roots, Response of
of trees to heavy metals 99
roots
Response of ; to mechanical impedance 27
roots, Responses of
to hypoxia: their structural and energy relations with the whole plant 41
rose cells, cultured
Plasma membrane effects of salicylic acid treatment on 267
salinity, SO_2 and
Effects of , on nitrogenase activity, nitrogen concentration and growth of young soybean plants 529
salicylic acid treatment
on cultured rose cells; Plasma membrane effects of 267
Salvia sclarea
Chromium toxicity in ;—I. Effects of hexavalent chromium on seed germination and seedling development ... 405
sclerophyllous Ericaceae
Response of ; to enhanced levels of ultraviolet-B radiation 233
Seasonal changes
Adapaptive responses of roots and root systems to 175
seasonal growth
of foliose lichens in successive years in South Gwynedd, Wales 225
Secretion
and uptake of salt ions by detached *Leptochloa fusca* L. Kunth (Kallar grass) leaves 259
seed germination
and seedling development. Chromium toxicity in *Salvia sclarea*—I. Effects of hexavalent chromium on 405
seedling development
chromium toxicity in *Salvia sclarea*—I. Effects of hexavalent chromium on seed germination and 405
seedlings, loblolly pine
Effects of ozone and simulated acidic precipitation on ectomycorrhizal formation on 423
seeds, skotodormant
of *Hygrophila auriculata* ; Acidification, growth promoter and red light effects on germination 471
seeds, thermodormant lettuce
Actions of acid immersion, red light and gibberellin A_3 treatments on germination of 397
Shoot–root interactions
during floral transition: a possible role for cytokinins 459
short-term effect of ammonium
on nitrogenase activity of cyanobacteria from rice fields; Influence of pH, light intensity and oxygen on the 545
size-enhancing effects
Air temperature modifies the ; of atmospheric CO_2 enrichment on sour orange tree leaves 293
skotodormant seeds
of *Hygrophila auriculata*; Acidification, growth promoter and red light effects on germination of 471
slash pine
(*Pinus elliotti* var. *densa*); Histological effects of ozone on 505

SO_2 and salinity
Effects of , on nitrogenase activity, nitrogen concentration and growth of young soybean plants 529
SO_2 pollution, sublethal;
Responses of nitrogen metabolism parameters to ; in wheat [*Triticum aestivum* cv. Wilgoyne (Ciano/Gallo)] under mild NaCl stress 479
sodium, concentrations of
sulfur, chlorine and iron on/in the thallus cortex in the lichen *Ramalina duriaei* (DeNot) Bagl.; Temporal and spatial fluctuations of ethylene; production and 533
soil environment
The impact of the ; on the growth of root systems 53
soil oxygen deficiency
The influence of , on alcohol dehydrogenase activity, root porosity, ethylene production and photosynthesis in *Spartina patens* 565
soil, radioactive
In vitro response of *Dactylis glomerata* leaf segments as affected by growing donor plants in 501
solar irradiation, Effects of
on motility and pigmentation of three species of phytoplankton 515
somatic embryogenesis
in *Dactylis glomerata*; Relationship of abscisic acid to 495
sorghum leaves
Osmoticum, water, and dry matter deposition rates in the growth zone of ; under water deficit conditions 447
sour orange tree leaves
Air temperature modifies the size-enhancing effects of atmospheric CO_2 enrichment on 293
Interactive effects of atmospheric CO_2 enrichment and light intensity reductions on net photosynthesis of 367
soybean cultivars
exposed to enhanced UVB radiation; Biological responses of two 347
soybean plants, young
Effects of SO_2 and salinity on nitrogenase activity, nitrogen concentration and growth of 529
Spartina patens
The influence of soil oxygen deficiency on alcohol dehydrogenase activity, root porosity, ethylene production and photosynthesis in 565
spinach plants
Starch accumulation during hydroponic growth of basil and ; under carbon dioxide enrichment 313
spinach branches, red,
Physiological response to controlled freezing of attached 591
spruce foliage, red
Moderate water stress alters carbohydrate content and cold tolerance of 383
Starch accumulation
during hydroponic growth of spinach and basil plants under carbon dioxide enrichment 313
stomatal conductance
A general relationship between CO_2-induced reductions in ; and concomitant increases in foliage temperature 443
stress, mild, NaCl
Responses of nitrogen metabolism parameters to sublethal SO_2 pollution in wheat [*Triticum aestivum* cv. Wilgoyne (Ciano/Gallo)] under 479
stressful conditions
The ultrastructural response of root cells to 111
structural and energy relations
with the whole plant; Responses of roots to hypoxia: their 41
sublethal SO_2 pollution
Responses of nitrogen metabolism parameters to , in wheat [*Triticum aestivum* cv. Wilgoyne (Ciano/Gallo)] under mild NaCl stress 479
sulfur, concentrations of
sodium, chlorine and iron on/in the thallus cortex in the lichen *Ramalina duriaei* (DeNot) Bagl. ; Temporal and spatial fluctuations of ethylene production and 553
Synechocystis aquatilis
pH-Dependent cadmium transport inhibits photosynthesis in the cyanobacterium 331
Synechococcus sp.
adaptation of, to 0.4 M NaCl; Changes in RNA and protein synthesis associated with the 539
temperature, Air
modifies the size-enhancing effects of atmospheric CO_2 enrichment on sour orange tree leaves 293

temperature, Effects of
on cell division in root meristems of natural populations of *Dactylis glomerata* of contrasting latitudinal origins 433
temperature, foliage
A general relationship between CO_2-induced reductions in stomatal conductance and concomitant increases in ... 443
temperature
The effects of, on primary root growth dynamics and lateral root distribution in garden pea (*Pisum sativum* L., cv. "Alaska") 243
thallus cortex
in the lichen *Ramalina duriaei* (DeNot) Bagl.; Temporal and spatial fluctuations of ethylene production and concentrations of sulfur, sodium, chlorine, and iron on/in the..... 553
thermodormant
lettuce seeds; Actions of acid immersion, red light and gibberellin A_3 treatments on germination of..... 397
tolerance to lead
Mineral status of dicotyledonous crop plants in relation to their constitutional 575
toxicity, Chromium
in *Salvia sclarea*—I. Effects of hexavalent chromium on seed germination and seedling development 405
transition, floral
Shoot–root interactions during , : a possible role for cytokinins..... 459
transmembrane potential
hypo- and hyperpolarization effects; Electric field-induced inhibition of electrogenic pumping in *Nitella*: analysis for..... 209
transport, cadmium, pH-Dependent
inhibits photosynthesis in the cyanobacterium *Synechocystis aquatilis*..... 331
tree leaves, sour orange
Air temperature modifies the size-enhancing effects of atmospheric CO_2 enrichment on 293
trees
Response of roots of ; to heavy metals 99
triphenyl tetrazolium chloride reduction viability assay
Applicability of the ; to the measurement of oxidative damage to cucumber cotyledons by bisulfite 357
Triticum aestivum cv. Wilgoyne (Ciano/Gallo)
Responses of nitrogen metabolism parameters to sublethal SO_2 pollution in wheat [ ] under mild NaCl stress..... 479
tropical orchids
Nitrogen uptake by..... 273
ultrastructural response
The ; of root cells to stressful conditions 11
ultraviolet-B
radiation damage ; Leaf hairs of *Olea europaea* protect underlying tissues against..... 341
ultraviolet-B radiation
Responses of sclerophyllous Ericaceae to enhanced levels of 233
ungerminated pollen grains
A method to separate germinated from 415
uptake, Nitrogen
by tropical orchids..... 273
uptake of salt ions
Secretion and ; by detached *Leptochloa fusca* L. Kunth (Kallar grass) leaves 259
uptake, Photosynthetic carbon dioxide
and oxygen accumulation during *in vitro* cultures of *Actinidia deliciosa* cv. Tomuri 523
UVB radiation, enhanced
Biological responses of two soybean cultivars exposed to..... 347
VA mycorrhizal infection
and the morphology and function of root systems..... 159
"Valencia" orange
Photosynthesis and freeze tolerance comparisons of the newly released "Ambersweet" hybrid with 391
viability assay, triphenyl tetrazolium chloride reduction
Applicability of the ; to the measurement of oxidative damage to cucumber cotyledons by bisulfite 357
Wales, South Gwynedd
Seasonal growth of foliose lichens in successive years in 225
water deficit
Influence of, on the phytotoxicity of imazamethabenz and fenoxaprop among five wild oat populations 283

water deficit conditions
Osmoticum, water and dry matter deposition rates in the growth zone of sorghum leaves under 447
water relations
in broom snakeweed (*Gutierrezia sarothrae*) under greenhouse- and field-grown conditions; Drought-induced changes in 323
water stress, Moderate
alters carbohydrate content and cold tolerance of red spruce foliage 383
wheat [*Triticum aestivum* cv. Wilgoyne (Ciano/Gallo)]
under mild NaCl stress; Responses of nitrogen metabolism parameters to sublethal SO_2 pollution in 479
whole-plant level?, predictive approach at a
Carbon nutrition, root branching and elongation: can the present state of knowledge allow a 121
